

Australian BullCharts User Group

BullCharts* software is fast gaining popularity, with a great User Group running since July 2006, and very useful and friendly monthly meetings in Melbourne, and “Remote User Group” meetings by *webinar* with Skype held one week after the Melbourne meeting (same agenda items).

Key BullCharts* features:

These are discussed from time to time at meetings, with real demonstrations, to help everyone learn more about Technical Analysis, as well as BullCharts*.

- Readily specify which **Watchlist(s)** to **Scan** through.
- **Save a price chart** with indicators and annotations as a file for easy recall and viewing later.
- **Easy** to modify **indicators** (no programming!) or **create new ones**.
