3	<p>Enhancing the custom MA indicator ribbon and scan — Last month we studied BullScript with a specific case study example — a Moving Average Crossover Ribbon (refer to the sample screen shot below, and the minutes of last month's meeting for more details, and the script that we wrote.) The time periods in that script were hard-coded. We used the combination of 7 and 12 period Moving Averages (MA), and the indicator ribbon is green when the 7 is above the 12, and red for the opposite condition.</p> <p>BUT — What if you want to easily change the two MA values to readily see the result? We can easily tweak the BullScript from last month so that it prompts for these values — using the BullCharts INPUT function (see your own BullScript Help for details — menu option: Help).</p> <p>In this month's sessions we will show how to find existing chart indicators that request input (so that we can understand how it works), and we will demonstrate how to tweak last month's BullScript to do exactly that.</p> <p>In this session if time permits, we will also create a scan to find the stocks that currently meet this condition in all of the daily, weekly and monthly time periods (using the BullCharts multi-scan feature). This will be a must-see session.</p> <p>[You can download past user group presentations from the BCUG Presentations folder.]</p>	60	Robert

A couple of people (until time runs out), tell us about a stock (or CFD, etc.) you traded recently with either a great result, or a bad one (ie. bought and sold), and explain: (i) the strategy, (ii) criteria for entry and (iii) exit, and (iv) the end result.</p>	10	
6	<p>General Business:</p> <p>(a) Tech Tips — Any technology-related tips, eg. Sample trading strategies? <i>CFD Providers?</i> (eg. Robert Grigg, Stuart McPhee on “Trade Exits”; Author Strategy).]</p> <p>(d) AOB — Any other business?</p>	15	(all)
